

To complete the firmware upgrade you will need;

- Computer
- Phillips Head Screw driver
- Paper clip
- USB Micro Cable
- Mezzo battery key
- The latest Mezzo firmware file

## **1. Manually Update the firmware on Mezzo**

You'll need a screw driver to remove the back panel and a paper clip to push the reset button:

1.1 Download the latest Mezzo firmware from the link provided to you. or [here](#)

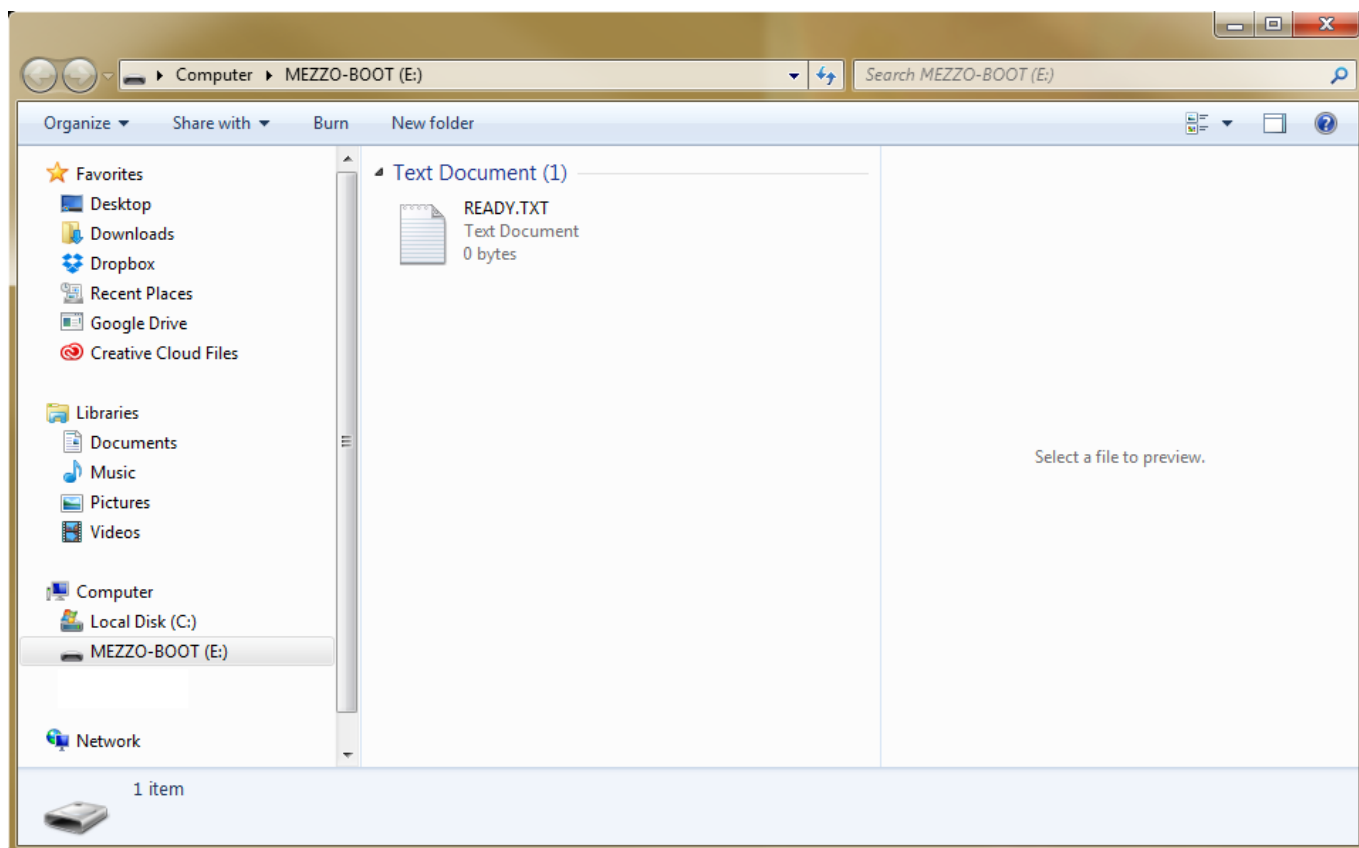

1.2 Disconnect the Mezzo from power and turn off the battery using the keyswitch

1.3 Plug USB Micro cable in to your PC

1.4 Use a paperclip to hold in the reset button and whilst holding it in, connect a USB Micro Cable to the Mezzo:

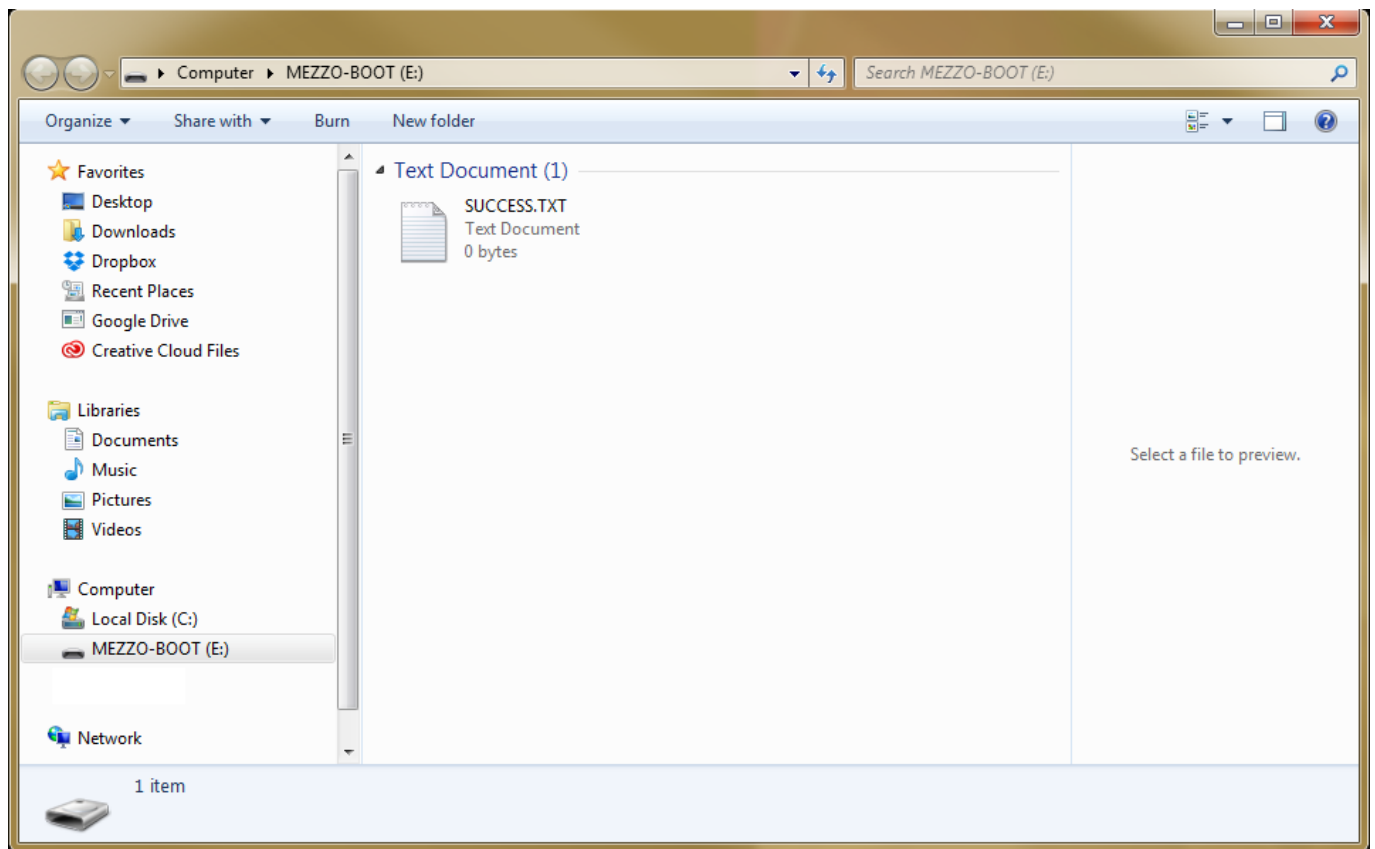

1.5 Remove the paperclip, and a new hard drive will appear on your computer labelled MEZZO-BOOT:

1.6 Drag or Copy/Paste the Firmware file from your computer to the MEZZO-BOOT Drive

1.7 If the update is Successful the Drive will disappear and re-appear as follows:

1.8 Disconnect your Mezzo from the computer

1.9 Plug your Mezzo back into the mains and turn on the battery to start it up again.
